

Team Contract

Goals

- Receive an A on the project
- In order to get an A, each member will do approximately the same amount of work on the project.
- One or more members of the team will not do more work than the other(s) to get an A on the project

Meeting Norms

- Meetings will generally be held during class time, every member is expected to come.
- In-class time will be used to go over the progress we have made as a team toward the completion of the project. Each team member will discuss what they have done since the last meeting as well as what they will accomplish by the next meeting.
- We will meet on Wednesday 11/25 to discuss the warmup, then we won't meet again until Monday 11/30.
- Meetings outside of class will be held as needed.

Work Norms

- Team members are expected to contribute to each part of the project (specs, tests, implementation, design, etc.).
- Individual members can work a little bit more on aspects where they are strong, but not a disproportionate amount.
- Deadlines and work responsibilities will be kept on a Google doc.
- Each person is responsible and accountable for his fair share of the work.

Decision Making

- At least two of the three members need to agree on a particular change.

Members:

-Parker Greene
-Brian Huang
-Manjot Sangha
